PROFESSIONAL EXPERIENCE

HCA Healthcare, Parallon — Nashville, TN ***April 2026–Present***

Project Manager II

- Coordinate schedules, milestones, dependencies, and risks across three AI-enabled revenue cycle initiatives built on Palantir Foundry.
- Lead weekly core-team meetings with executive business owners, presenting project status, and aligning priorities throughout all phases of the product lifecycle.
- Spearheaded efforts to coordinate with our shared services teams to ensure delivery of education, change management, communications, and testing resources.
- Support the rollout of one initiative into production and across its operational user base, while coordinating the work needed to advance two other initiatives toward pilot and user acceptance testing.
- Maintain project plans, status updates, risk and issue tracking, and resource forecasts in line with PMI processes.

KPMG LLP — Nashville, TN ***September 2025–March 2026***

Senior Associate, Indirect Tax Technology

- Worked across four enterprise client engagements implementing tax technology integrated with SAP, including configuring solutions, mapping data, testing integrations, and resolving defects.
- Used Python and Alteryx to build and update workflows for processing and validating ERP transaction data and other business data affected by implementations.
- Tested API requests in Postman and executed system integration and user acceptance tests, documenting issues and working with technical teams to resolve them.
- Created data mappings, workflow diagrams, validation findings, and technical documentation to help teams understand system behavior and troubleshoot implementation issues.

HCA Healthcare, Parallon — Nashville, TN ***September 2023–September 2025***

Project Manager

- Coordinated planning and delivery for a program supporting five hospital revenue cycle applications, working with a dedicated team of five developers, two business analysts, and two test analysts.
- Tracked and reported a $1.67M operating budget and $50K capital budget, maintaining financial forecasts and change requests and coordinating with business stakeholders when budget constraints affected delivery.
- Co-led monthly program governance meetings with executive stakeholders, presenting project status, financial forecasts, and proposed work to support leadership decisions.
- Owned the project plan and risk tracking for a cloud migration of a payment collection system, coordinating with a vendor integration partner, two related systems undergoing upgrades, four downstream teams, dependent applications, and facility websites.
- Established communication channels among product managers, business owners, and executive sponsors that reduced project discovery and planning time by approximately two weeks.
- Identified unused capital funds and coordinated their reallocation to server-stack upgrades intended to improve application performance.
- Assisted with developing Power BI reporting workflows, reducing manual reporting effort and improving access to project information.

Ducharme, McMillen & Associates (DMA) — Nashville, TN ***July 2021–August 2023***

Consultant, Indirect Tax Technology

- Supported day-to-day delivery across approximately 8–10 enterprise software implementation engagements involving Vertex O-Series and SAP ECC, handling project management, data mapping, requirements, and technical documentation.
- Worked with client executives, product owners, developers, and business analysts to gather requirements and document tax-engine-to-ERP integration needs and data mappings.
- Supported three Vertex O-Series go-lives by preparing cutover plans, coordinating deployment activities, and resolving production issues to help minimize business disruption.
- Tested SAP ECC–Vertex configurations, investigated defects, and worked through issues to help verify system behavior before deployment.
- Prepared training materials and process documentation to explain system functionality and indirect tax workflows to client and internal teams.

Associate Consultant, Indirect Tax Technology

- Developed and tested REST API requests between client ERP systems and Vertex O-Series, using Postman to check request and response behavior, validate data mappings, and troubleshoot integration issues.
- Wrote Python scripts to help migrate legacy Vertex Q-Series data, reducing client-billed project hours by 15%.
- Prepared project plans, requirements documents, and implementation materials using Microsoft Office and Smartsheet for clients in retail, financial services, and manufacturing.

TECHNICAL SKILLS

Project Delivery: Project planning, milestone tracking, Agile/Scrum, risk and issue management, budget tracking, forecasting, stakeholder coordination, governance, change control

Business & Systems Analysis: Requirements gathering, data mapping, workflow diagrams, system integration testing (SIT), user acceptance testing (UAT), defect tracking, technical documentation, process analysis, prompt engineering

Tools & Technologies: LLMs**,** Palantir Foundry (project-level exposure), Microsoft Project, Jira, Azure DevOps, Smartsheet, Power BI, Tableau, Alteryx, Python (working knowledge), SQL (working knowledge), Postman, REST APIs (working knowledge), Git/GitHub (working knowledge)

EDUCATION

Belmont University — Nashville, TN
Master of Accountancy (MAcc), Emphasis in Data Analytics, Cum Laude
Awards: Dean's List

Southern Illinois University Edwardsville — Edwardsville, IL
Bachelor of Science in Accountancy, Cum Laude
